Angler reports are an important source of information for evaluating and improving the stocking program
Report your fishing trip: steve.scholten@ontario.ca or 705-646-5523

Brook trout and lake trout may be fin clipped to allow identification of naturally reproduced fish and assess stocking success
Fin Clip Codes: L: left, R: right, P: pectoral fin, V: ventral (pelvic) fin, AD: adipose fin
Rainbow and Brown Trout and Splake are not fin clipped as do not reproduce; walleye are usually too small to clip when stocked
Fish are typically stocked as spring yearlings, except rainbow trout (fall) and walleye (summer fingerlings)
"F" indicates brook trout and splake stocked in the fall

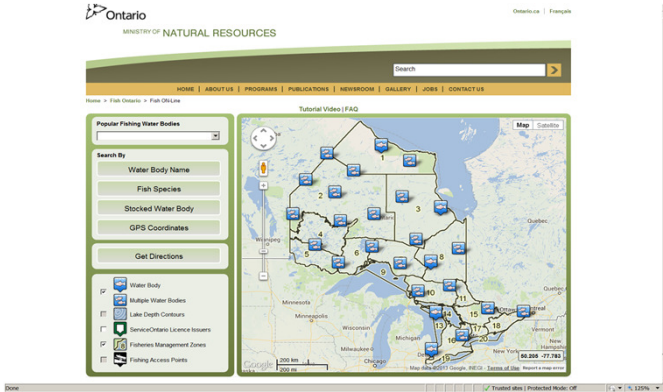

* some lakes stocked with lake trout in 2013 had a small proportion of RPLV clips (9% of fish) instead of AD clip
